AT-D878UV CPS and Firmware version 1.09 (Dec 3, 2018)

AT-D878UV CPS Version 1.07

READ THIS FIRST
Plug your radio into your windows computer WITHOUT installing the driver. Windows should find the driver automatically.

FIRMWARE 1.13

Your radio's firmware version is listed on the front of the box or on the "READ THIS FIRST" slip.

5. Install the CPS

After it's installed, you can either build a codeplug from scratch or find one for your area. We have a codeplug bank with user submitted codeplugs for most areas and states. You will find this on our website in the top menu bar.

Download a Codeplug

Go to: bridgecomsystems.com

6.

Next Step

Take advantage of your FREE access code for the AnyTone course on BridgeCom University.

Go to: bridgecomuniversity.com
